Notes

Content Patch #13 adds 11 fields to the PropertyUnitTypes resource and adds 52 new lookup values.

Beginning with this patch, we're implementing a two-track deployment process for content patches. Low-impact items like lookup value additions will go live when the change is deployed. But we can now separate the release of new fields from the code and data deployment itself. This means we can give you a longer notification period for the things that you may need more time on, while not delaying changes that likely don't take special handling on your part.

The lookup values in this patch will be live on Monday July 6.

The new fields will be enabled and appear in the Trestle metadata on Friday July 17.
