Notes

Content Patch #139 completes the Public Record data set by adding Building, Site, and TaxAssessment resources.

It also adds fields to denormalize ListAgentKey into the CustomProperty, Media, OpenHouse, PropertyRooms, and PropertyUnitTypes resources of the MLS data. This is the beginning of a move to denormalize a number of fields from the Property resource into the sub-tables so that those tables can be filtered by the most important properties of their listing.

These new fields will be enabled Friday Aug 7.
