Notes

Content Patch #141 adds 316 new enumeration values across 61 lookups.

It also adds the field UpstreamYN to the Member resource. Data consumers who have connections to Upstream data providers can use this field to distinguish between Members who are from the MLS roster data and Members who were created inside Upstream itself. In all other feed types, this field will be present and null.

This patch will be live mid-day Wednesday Oct 14.

New Fields

Your Feedback Wanted

Your feedback is key in setting product priorities!

As always, please let me know any feature requests, bug reports, or any other idea that would make your business more productive or easier to operate.

Thank you!

Dan Ray
Lead Product Manager, Trestle
